

The Problem:

Insect soil on the windscreen.

Windscreens are often highly soiled with insect dirt in summer times. In particular insect bodies hitting the screen at high speed are extremely hard to remove.

The Solution:

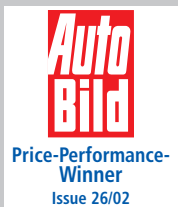

Insect Remover

Product Advantages:

With Super-Gel formulation – does not drip off, acts optimally

- Removes even persistent soil through its Super-Gel formulation. The CW 1:100 insect remover removes all insect residuals from windscreens completely and quickly.
- Excellently suited for cleaning the front section of cars (e.g. engine hood, bumper, radiator grill, headlamps and plastic headlamp diffusers).
- Extremely efficient use, as the product does not drip-off and therefore is highly effective. Guaranteed lacquer compatibility. Ideally suited as a pre-cleaner for car wash stations or cleaning on the go.

Applications:

Front windscreen, head lamps and passenger car front sections

How to apply:

Spray the soiled surface with CW 1:100 and let the product react shortly before entering a car wash or manual cleaning. Use a sponge in case of persistent soil. Rinse thoroughly with water. Ideally suited as a pre-cleaner for car wash station or cleaning on the go, e.g. at petrol stations. Also suited for cleaning passenger car front sections (e.g. engine hood, radiator grill, bumper and headlamps). Guaranteed lacquer compatibility!

Note: Do not use in extreme direct sunlight or on heated surfaces. Store the bottle in a frost-protected place.
